## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 -6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4 -6, each recite the limitation "the crystal grain layer" in line 3. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 - 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujikawa et al..

Fujikawa et al., U.S. Patent No. 6,299,739, discloses a wiring structure for semiconductor devices. As shown in the embodiment of Figure 1A, a seed layer 4 is deposited and a wiring film 5 of copper or copper alloy is deposited on the seed layer. The seed layer promotes the growth of large crystals during heat treatment. The seed layer has contact with the silicon semiconductor wafer 1 through the barrier layer 3.

***Allowable Subject Matter***

Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art does not teach the use of the recited materials for a crystal grain promotion layer.
